

SCHWEGO® antihaut 8172

Anti skinning spray

Function: SCHWEGO® antihaut 8172 will prevent any piling and skin formation of the offset printing inks.

After spraying it on the ink an airtight, crystalline film will form, which seals the surface of the oxidatively drying printing ink and this way prevents any skinning and piling.

SCHWEGO® antihaut 8172 can be used on the ink rollers, the ink fountain or for the ink can.

Properties:

- Protects the ink against the formation of skin and piling
- No rheological change of the ink
- Does not contain any vegetable fats and oils

Application: Spray SCHWEGO® antihaut 8172 on the ink from a distance of about 25 cm

Preservation of the ink rollers

Spray on the press roller that slowly stops rotating. Then stop the printing press.

Preservation of the inks fountains and ink cans

Spray uniformly across the entire surface. Air bubbles underneath the surface will burst this way. Small indentations will form. Now spray the surface a second time. Close ink thereafter.

Tip: Subject to appropriate storage, the described properties of SCHWEGO® antihaut remain stable for at least 24 months.

Packaging: SCHWEGO® antihaut 8172 500 ml spray can

Also available as liquids:
SCHWEGO® antihaut 8171 500 ml bottle
10 l can
200 l drum
